RELEVANT SKILLS AND ACHIEVEMENTS

INNOVATION

In my opinion, one of the main factors in development of digital concepts and it's implementation is innovation. I always attempt to consider this during the creation process and aim to achieve creative solutions. I believe that being a visual artist alongside my career enabled me to think uniquely and consequently avoid repetitive outcomes.

TEAMWORK

Both my previous education and job increased my abilities to work in team, by posing challenging tasks which could only be achieved with teamwork. I have worked with people of various ethical, social and cultural backgrounds in a friendly and collaborative environment. This provided me the opportunity to better understand and gain valuable insight on societies all over the world. I am eager to listen to other's ideas and create a pleasant atmosphere in the group, so that each member can perform at his/her best and thus attain satisfactory results. In my opinion, two fundamental factors to be successful in a team are avoiding egoism and assigning roles that fit everyone's strengths.

SELF DIRECTION AND SELF-PROMOTION

I am a competitive person and always strive to perform at a high level. Meanwhile my freelance experiences and working with projects assigned by significant companies like Qator A/S and B-mobilized, gave me valuable experience that enabled me to obtain self-discipline and time management skills. This has facilitated the accomplishment of efficient solutions.
